Groundhog Day!

A groundhog is a small animal that lives under the **ground**.
Groundhogs live in America and Canada.
In winter they **hibernate** like bears.
Americans believe groundhogs can **predict** the weather.
They say that the groundhog wakes up from its **hibernation** on February 2nd, in winter.
If it leaves its **hole** when it's sunny, it sees its **shadow**.
If it sees its **shadow**, it's scared and it goes back into its hole and there are 6 more weeks of winter weather.
But if it leaves its hole and it is cloudy, it doesn't see its **shadow** and it isn't scared, so it stays out of its home because spring is coming.

COMPLETE

1) Groundhog Day is on _____ 2nd.

A January **B** February **C** March **D** April

2) Groundhog Day is in _____

A Spring **B** Summer **C** Autumn **D** Winter
